Professor Kushner 396-010 **CRN 20993** 496-010 **CRN 20994**

This course addresses the effective management of nonprofit organizations. We start by reviewing the community, historical, social and legal contexts of the nonprofit sector in the U.S. These lead into the issues that are central to the course, relating to how nonprofits are managed. We examine structure and administration, leadership and management, marketing, finance, and resource development, and strategy, all in the nonprofit environment. We also highlight some concerns that are especially pressing for managers.

ES 480 Internship Environmental Policy 3 credits

Multiple sections available, Instructor permission needed
